"आइए, साथ मिलकर एक बेहतर भविष्य का निर्माण करें"

FROM THE FOUNDER'S DESK

Dr. Pravin Parmar, Founder & Chief Editor, Greenpreneur

"आइए, साथ मिलकर एक बेहतर भविष्य का निर्माण करें"

Friends,

I did not begin in a boardroom. I began on a farm.

I know what it means to depend on the land, to watch the sky, work the soil, and understand that the planet is not a resource to be spent, but a partner to be respected. That lesson never left me. From farmer to founder, it became the belief I built everything on: the entrepreneur who protects the planet is not sacrificing profit, but building the only kind of business that will still matter in 2047.

When we began Greenpreneur in 2022, we were not trying to host an event. We were trying to prove that belief. Five years on, it is no longer an argument. It is a movement.

This book is not a magazine. It is a record. Every face on these pages belongs to someone who decided, quietly, without applause, to build differently. To waste less. Employ more. Leave the ground better than they found it. They did not wait for policy or permission. They built.

I believe entrepreneurs are the real nation builders. The government builds the policy. Entrepreneurs build the execution. India's road to Viksit Bharat @2047 will not be won in conference halls, it will be won in factories, farms, and

workshops run by people who chose purpose over shortcuts. When India empowers its entrepreneurs, we empower families, create livelihoods, and carry Bharat to the world.

That conviction is why I have spent my life building tribes, not just businesses, 1 Million Entrepreneurs International Forum, VyapaarJagat, Fempreneur, Peers Global, and now Greenpreneur. Different names, one mission: entrepreneurs who grow together.

***"The planet does not need more talkers.
It needs more builders."***

So let me speak to you directly. If you have built a business that respects the planet, you already belong here. You are not an outsider hoping to be noticed. You are part of a legacy India will one day look back on and thank.

A movement is never built by one founder. It is built by a tribe that refuses to stay small. Across 148+ categories and thousands of stories, that is what we are building. If you have not joined yet, install the Greenpreneur app and become part of the tribe.

Do not read this book as a spectator. Read it as a Greenpreneur. The future we are building belongs to those who show up to build it.

The planet does not need more talkers. It needs more builders.

Welcome to the tribe.

Dr. Pravin Parmar

A tribe creator on a mission to enhance the lives of 1 Million Entrepreneurs globally.

GREENPRENEUR 2026

FROM THE DESK OF D.E.D / Global Advisor - Peers Global

- Niraj Shah

Celebrating Five Years of Purpose, Progress & Possibility

Congratulations to the entire Greenpreneurs Community on completing five remarkable years of inspiring change, fostering entrepreneurship, and championing sustainable thinking. This milestone is not merely a measure of time, but a testament to the collective energy of individuals who believe that business success and positive impact can grow hand in hand.

This special edition of the magazine celebrates members whose initiatives, achievements, and contributions are creating meaningful value within their industries and communities. Their stories remind us that progress is built not only

through ambition, but through purpose, persistence, and the willingness to innovate.

I would also like to acknowledge Dr. Pravin Parmar, Founder of Peers Global, whose vision has created a platform that reimagines the role of business communities in today's interconnected world.

At Peers Global, we have always believed that networking is about far more than exchanging referrals. Our foundation rests on the principle of LSR: Learning, Sales, and Resources. Every interaction has the potential to teach us something new, connect us to opportunities, and provide access to people, ideas, and resources that accelerate growth. Business often begins with a conversation, but meaningful growth begins with relationships.

As the world becomes increasingly connected, one truth becomes clearer: the future belongs to those who build strong networks. Opportunities rarely arrive directly. More often, they emerge through people who know people, opening doors that would otherwise remain unseen. In that sense, relationships are among the most valuable assets any professional can cultivate.

As our industry circles continue to grow across sectors such as MSME, Real Estate, Healthcare, and beyond, members gain the greatest value when they are clear about their own goals and aspirations. The clearer the destination, the more meaningful every connection becomes.

Peers Global is also driven by a larger purpose: to create impact at scale. Our collective pledge is to positively influence one million lives across the globe, a vision proudly conceived and nurtured in India.

As you read the inspiring stories featured in these pages, I invite you to view them not simply as achievements, but as possibilities. Every meaningful impact begins with an idea, grows through collaboration, and flourishes within a community that believes in shared success.

The strength of a community is not measured by who joins it, but by who contributes to it.

Let us continue to learn together, grow together, and create an impact far greater than any one of us could achieve alone.

From Startup Struggles to Dholera's Skyline:

The Inspiring Journey of **Dr. Akshay Kumar**, Founder of BroGhar Realty

How a Visionary Entrepreneur is Helping Shape the Future of Dholera Smart City and Creating Wealth Through Strategic Land Investments

Dr. Akshay Kumar, Founder and CEO of BroGhar Realty, heavily focuses on sustainability by championing investments in Dholera, India's first platinum-rated Greenfield industrial smart city. His firm advocates for investing in Dholera SIR because the city's blueprint is rooted in sustainable urbanization, integrating renewable energy, smart facilities and green urban planning.

Success is often judged by visible achievements—a luxury lifestyle, prestigious properties, or business recognition. Yet behind every successful entrepreneur lies a story of struggle, resilience, learning, and relentless execution. For Akshay Kumar, Founder and Director of BroGhar Realty Pvt. Ltd., the journey to becoming one of the most recognized names in Dholera real estate was built on years of persistence and calculated risk-taking.

and drop service startup. The concept showed promise, and he successfully developed the operational model.

However, like countless startups across the world, scaling the business proved far more difficult than building it.

Discovering Opportunity Where Others Saw Uncertainty

Real estate attracted Akshay because it rewarded patience, research, and strategic vision. Rather than following popular investment trends, Akshay focused on identifying future growth corridors before they became mainstream.

Why Akshay Kumar Believes in Dholera Smart City

For Akshay Kumar, Dholera is not merely a real estate market. It is one of India's most ambitious development projects and a symbol of the country's future growth.

The Beginning: A Dream Bigger Than Circumstances

Like many first-generation entrepreneurs, Akshay Kumar did not begin his journey with a family business empire or unlimited resources. Instead, he entered the business world armed with ambition, curiosity, and a willingness to learn.

More than a decade ago, he started

exploring various business opportunities, constantly searching for a model that could create sustainable value. His early ventures ranged from outsourcing projects for university students to service-based businesses catering to urban consumers.

Learning Through Real Entrepreneurial Challenges

One of Akshay's notable entrepreneurial experiments was a city-based pickup

"To make more Indians landowners in their own motherland — that is the mission driving every plot we curate at BroGhar."

Why to invest in DHOLERA?

DHOLERA HIGHLIGHTS

- Spread in 920 sq.kms
- Ahmedabad Dholera Expressway
- Dholera International Airport
- 91,000 Crore project by TATA
- World's biggest maritime museum – LOTHAL
- World's largest Solar Park
- 1st Green Field Smart City
- 1st Smart City on DMIC
- 6.5 kms. Stretch of River Front

Dholera Highlights:

- Ahmedabad-Dholera Expressway
- Dholera International Airport
- Delhi-Mumbai Industrial Corridor (DMIC)
- Semiconductor and Electronics Manufacturing Ecosystem
- Renewable Energy Projects
- World's Largest Solar Park Region
- Lothal Maritime Heritage Complex
- Smart Urban Infrastructure

Building BroGhar Realty: A Mission Beyond Business

Established in 2016, BroGhar Realty Pvt. Ltd. was founded with a clear objective—to help investors identify strategic land opportunities that can generate long-term value.

The Mission: Creating More Landowners in India

At the heart of Akshay Kumar's business philosophy lies a powerful mission: To make more Indians landowners in their own motherland.

Leadership Built on Learning

His advice to aspiring entrepreneurs:

- Never stop learning
- Seek guidance from mentors
- Learn from failures instead of fearing them
- Think long term
- Focus on value creation rather than quick profits

Beyond Real Estate: A Vision for India's Future

Akshay Kumar believes India is entering a transformative phase driven by infrastructure development, manufacturing expansion, technology innovation, and urban growth.

A Story of Persistence, Vision, and Purpose

From navigating startup challenges to becoming one of the prominent faces of Dholera real estate, Akshay's journey demonstrates that extraordinary achievements are built through consistent effort, strategic thinking, and unwavering commitment.

SPREADING *The Light*

Dr. Sachin Shigwan

The Solar Man of India is the Founder of Green India Initiative Pvt. Ltd and offers Corporate Social Responsibility (CSR) Consultancy Services

During a rural development mission with Rotary Club, Dr. Sachin Shigwan witnessed a scene that would shape his life's mission. He saw students struggling to study under the dim light of hazardous kerosene lamps. The sight reminded him of his own childhood, when oil lamps were commonly used in homes and schools.

That experience sparked a powerful vision: a future where clean, green, and affordable electricity could transform rural communities. He imagined villages where students could study comfortably at night, families could enjoy well-lit homes with fans and essential appliances, farmers could improve productivity through reliable power, healthcare centres could operate modern equipment, local enterprises could flourish, and solar-powered street lights could make communities safer.

Dr. Shigwan realized that many of rural India's challenges—including food security, access to clean water, healthcare, education, and livelihoods—could be addressed by bridging the nation's energy gap.

“One Man's Light-Fueled Mission to Empower Rural India

Thus, Green India Initiative Pvt. Ltd. (GIPL) was founded in 2014 with a mission to electrify 10,000 villages and provide energy access to more than 10 million underprivileged rural citizens by 2035. Led by Dr Sachin Shiwan, GIPL has provided solar energy for schools and Anganwadi electrification, gram energy projects such as solar street lights, solar water pump systems, solar water filtration systems, solar cookers, and solar home lighting systems.

What makes him a leader of a social enterprise is his fusion of technical expertise, business insight, and a human-centric mission. Whether he's in a boardroom with executives or on the field with villagers, his goal remains the same: energy equity and climate resilience for India. Armed with an honorary doctorate and an MBA in Social Entrepreneurship, he is known for his commitment to providing solar energy for grassroot-level development. The statistics are compelling: Through turnkey projects like the Gram Energy Project, GIPL has impacted over 120,000 beneficiaries in more than

1,020 villages, addressing education, water access, healthcare, safety, and livelihood development—all while cutting 3,500+ tons of potential carbon emissions that would have resulted from the use of fossil fuels and other technologies. Not surprisingly, he is often called the Solar Man of India.

1,020+
Villages Reached

120,000+
Lives Impacted

3,500+
CO₂ Emissions Averted

The path to Empowerment Through SolarEnergy

GIIPL Team begins the process of rural electrification by conducting a baseline and technical survey of the target area to assess beneficiaries' needs.

Following the studies, the company representatives discuss with government authorities, institutions such as schools, gram-panchayat members, and individual households to determine the priorities for the solar project.

Based on the outcomes of the studies and stakeholder interactions, the strategy is designed for the village's solar intervention: Engineering, Procurement & Commissioning of Quality Materials according to the design, training, documentation, and preparation of the final project report with an internal team before the execution of the project. GIPL also provides solar solutions for large-scale commercial projects, societies, and educational institutes.

The organization frequently serves as a bridge between corporate CSR and ESG initiatives, non-governmental organizations, and rural beneficiaries, ensuring that resources reach communities where they can create the greatest impact.

Importantly, GIPL's projects do not end with installation. Continuous maintenance, stakeholder engagement, awareness programs, and local capacity building ensure the long-term sustainability of each intervention.

With more than 15 years of experience in CSR consulting, rural electrification, and community empowerment, Dr. Shigwan has emerged as a transformative force in India's sustainability movement. His organization does far more than install solar infrastructure—it empowers communities, promotes climate action, and drives inclusive economic growth through universal energy access.

Alignment With The UN SDGs

Dr Sachin Shigwan's solar energy initiatives are directly aligned with the United Nations Sustainable Development goals.

Solar power is one of the primary drivers for achieving SDG 7 (Affordable and Clean Energy). It also has an impact on the other SDGs such as SDG 1 (No Poverty) as it boosts productivity, SDG2 (Zero Hunger, as it improves agricultural productivity and provides clean energy to kitchens, SDG 8 (Decent Work & Economic Growth) as it creates jobs, and SDG 13 (Climate Action) as it replaces polluting fossil fuels, drastically reducing carbon dioxide and greenhouse gas emissions.

Benefits of Solar Energy

- **Clean Energy**
- **Green Energy**
- **Cost-Effective Electricity**
- **Greater Energy Independence**
- **Lower Energy Costs**
- **Reduced Carbon Footprint**
- **Reliable Power in Rural Areas.**

Ayushi Lakum & Harmish Lakum: Weaving a Mother's Dream into Zarya

At a time when sustainability is moving from a niche concern to a business imperative, **Ayushi Lakum** and **Harmish Lakum** are among the young entrepreneurs seeking to align enterprise with environmental responsibility. Through **Zarya**, they represent a generation that views sustainability not as a marketing trend but as a framework for innovation and long-term value creation.

How Two Young Entrepreneurs Turned Family Values into a Fashion Brand

Some businesses are created to fill a gap in the market. Others are born from something far more personal—a dream, a promise, and a deep sense of purpose. For siblings Ayushi Lakum and Harmish Lakum, entrepreneurship began with a simple desire: to bring their mother's long-cherished dream to life.

Young Minds, One Shared Vision

Ayushi Lakum, a Sustainable Fashion and Textile Design student at Anant National University, and Harmish Lakum, an MBA postgraduate, combined their creativity, passion, and business knowledge to build something meaningful together. Their shared goal was to honour their mother's vision while celebrating Indian craftsmanship.

The Birth of Zarya

In March 2026, the siblings launched Zarya, a home-grown ethnic wear brand rooted in tradition, craftsmanship, and family values. The brand specializes in pure cotton and silk garments enhanced with traditional techniques such as mirror work, appliqué work, and Kutchi embroidery.

Preserving Heritage Through Fashion

For Ayushi, fashion is more than aesthetics. Her design philosophy focuses on sustainability, storytelling, and preserving India's rich textile

heritage. Through Zarya, she seeks to create garments that connect modern women with traditional craftsmanship.

Building with Purpose

While Ayushi leads the creative direction, Harmish contributes strategic thinking and responsible business practices. Together, they are building a brand that balances tradition with innovation and cultural preservation with business growth.

More Than a Brand

Zarya is more than an ethnic wear label. It is the story of a family dream, a mother's inspiration, and two young entrepreneurs determined to create something meaningful. Every design reflects the values, love, and dedication that inspired the brand.

Looking Ahead

As Zarya continues to grow, Ayushi and Harmish remain committed to celebrating Indian craftsmanship, supporting traditional artisans, and creating timeless fashion that helps people stay connected to their roots.

Redefining Sustainable Packaging for a Smarter Future

Brijesh Patel | Aerolam Insulations Pvt. Ltd.

Packaging is no longer just a protective layer around products—it has become a strategic business advantage. As global industries move toward sustainability, companies are seeking solutions that reduce environmental impact without compromising performance.

Recognizing this shift early, Brijesh Patel, Founder of Aerolam Insulations Pvt. Ltd., has positioned Aerolam as a leader in sustainable insulation and packaging solutions. Since establishing the company in 2011, he has transformed it into a globally recognized brand known for innovation, performance, and environmental responsibility.

Engineering Sustainability

Built on the values of R.I.S.E. — Responsible, Innovative, Sure, and Empathetic, Aerolam develops energy-efficient insulation and advanced packaging solutions that help industries reduce waste, improve logistics, and lower carbon emissions.

Today, Aerolam operates six manufacturing facilities, serves customers in over 26 countries, and continues expanding its global footprint with a new facility in Bahrain.

Key Strengths

- Pioneer in reflective insulation products in India
- Strong presence across insulation and industrial packaging sectors
- Export network spanning multiple international markets
- Innovative product portfolio focused on sustainability and efficiency

Innovation That Creates Impact

Under Brijesh Patel's leadership, Aerolam has introduced several industry-first innovations, including:

- **Double Bubble Insulation**
- **Mono-Material CPP Films**
- **Metallized Barrier Films**
- **Advanced Pre-Insulated Solutions**

Each innovation is designed to improve energy efficiency while supporting environmentally responsible manufacturing practices.

AeroPro Box:

The Future of Industrial Packaging

One of Aerolam's most impactful innovations is the AeroPro Box, an advanced reusable packaging solution designed for high-value industries such as electronics and automotive manufacturing.

The AeroPro Box delivers superior protection against physical impact, moisture, contamination, and handling damage while offering exceptional durability and operational efficiency.

Key Environmental Benefits

- Designed for hundreds of reuse cycles
- Manufactured using 100% recyclable polypropylene
- Reduces packaging waste significantly
- Minimizes landfill contribution
- Supports lower carbon emissions through optimized logistics

One of its most valuable advantages is its **collapsible design, reducing return freight volume by up to 70% and warehouse storage requirements by up to 80%.**

For organizations focused on operational efficiency, sustainability goals, and supply-chain optimization, AeroPro Box offers a smarter and greener alternative to traditional packaging solutions.

Looking Ahead

For Brijesh Patel, sustainable packaging is not simply an environmental initiative—it is the future of business competitiveness. As industries worldwide embrace greener supply chains, Aerolam continues to lead through innovation, helping businesses achieve efficiency, compliance, and measurable sustainability outcomes.

Why Industries Choose AeroPro Box

Superior Shock Protection

Its unique honeycomb bubble structure absorbs impact and vibration, protecting sensitive components during transportation.

Waterproof & Contamination Resistant

Unlike conventional packaging, AeroPro Box is fully waterproof, dust-resistant, and does not release fibers or particles.

High Load-Bearing Strength

Its lightweight yet robust construction provides excellent strength-to-weight performance for heavy industrial components.

Customizable Design

Precision partitions and inserts allow safe transportation of delicate and complex products.

Sustainability Beyond Reusability

The AeroPro Box reflects the principles of a circular economy.

“The future belongs to solutions that combine sustainability with engineering intelligence.”

— BRIJESH PATEL

PORCIOUS FROM MORBI TO 121 COUNTRIES

THE JOURNEY OF A GLOBAL
SURFACE BRAND

Building a Global Legacy in Porcelain Surfaces

In manufacturing, many companies produce products, but only a few create brands that leave a lasting impact. Porcious is one such success story. What began in Morbi, Gujarat—the ceramic capital of India—has grown into a globally trusted porcelain surface brand serving customers across 121 countries.

The Foundation of Excellence

The journey began with **Dhiren Vadsola**, whose three decades of industry experience laid the foundation for a company built on quality, trust, and long-term relationships. His vision was simple: true success comes not from production volume, but from creating value and earning customer confidence.

**"From Morbi to the World—A Legacy Built on
Quality, Innovation, and Global Trust."**

Driving Global Growth

Under the leadership of **Rajan Vadsola (CEO)**, Porcious expanded its presence to 121 countries. Supporting this growth, **Pratik Patel (COO)** strengthened operations and product development, while **Amit Patel (CMO)** played a key role in building the brand's global identity and market presence.

Manufacturing Strength at Scale

Today, Porcious operates six advanced manufacturing facilities in Morbi, delivering world-class quality and innovation.

Key Manufacturing Highlights

- **450,000 Sq. M. Factory Area**
- **80,000 Sq. M. Daily Production Capacity**
- **1,500+ Tile Designs**
- **10+ Sizes & Finishes**
- **6 Manufacturing Units**
- **Presence in 121 Countries**
- **15+ Overseas Warehouses**

Creating More Than Surfaces

Porcious combines advanced ceramic technology with contemporary design to

create premium porcelain surfaces. Its portfolio includes porcelain slabs, marble-inspired collections, wooden finishes, and vitrified tiles.

The Marble Lab, inspired by the philosophy #BetterThanMarble, blends the beauty of natural marble with superior durability and performance.

A Vision Beyond Manufacturing

Porcious products are trusted in residential, hospitality, commercial, and retail projects worldwide. Guided by Quality, Trust, Integrity, Innovation, and Long-Term Relationships, the company continues to invest in technology,

sustainability, and customer experience.

Porcious: Building Sustainable Spaces with Durable Porcelain Solutions

A premium porcelain tile manufacturer, Porcious emphasizes longevity as its sustainability focus:

- Durable products designed for long service life.
- High-quality manufacturing and continuous R&D.
- Ethical and transparent business practices.
- Innovation that creates long-term value for customers and communities.
- Large-scale manufacturing with a focus on international quality standards.

Armor Fire: Protecting Lives Through Quality and Purpose

**Mr. Ankur Babariya
(Founder)**

**Mr. Pritesh Babariya
(Managing Director)**

A sustainable society is built not only through environmental responsibility but also through the protection of human life and critical infrastructure. This belief drives Armor Fire, a leading fire safety equipment manufacturer founded by brothers Ankur J. Babariya and Pritesh J. Babariya.

Established in 2010 in a modest 900 sq. ft. rented facility with just two engineers and a small workforce, Armor Fire began with a simple but powerful vision: to create products that people could trust when safety mattered most. What started as a small engineering and stainless-steel casting operation soon evolved into a dedicated fire safety enterprise focused on protecting lives, businesses, and communities.

The early years were marked by limited resources, intense competition, and operational challenges. Yet the founders remained committed to quality, integrity, and customer satisfaction. Their determination helped the company steadily expand its manufacturing capabilities and infrastructure.

By 2013, Armor Fire had grown into a larger facility, strengthening its production of fire-fighting equipment. Continuous investments in skilled talent, advanced manufacturing processes, and customer-focused operations

enabled the company to build a strong reputation in the industry.

A significant milestone came in 2015 with the introduction of advanced CNC machinery, enhancing manufacturing precision and product quality. Subsequent modernization initiatives strengthened the company's research, development, and in-house production capabilities, reflecting the founders' belief that innovation and hard work must go hand in hand.

The company's growth accelerated further with strategic infrastructure investments, culminating in 2021 with the acquisition of a 16,200 sq. ft. manufacturing facility. Today, Armor Fire operates across more than 26,000 sq. ft. of production space, making it a fully integrated manufacturer of fire-fighting equipment.

Throughout its journey, the company has remained guided by

a simple philosophy: “Customer First, Customer is God.” Every decision is rooted in three commitments—premium quality, timely delivery, and customer respect. This approach has helped Armor Fire build long-term relationships with customers, consultants, contractors, and distribution partners.

The organization’s culture is built on integrity, transparency, continuous learning, and innovation. Its core purpose—“To Grow & Secure Lives with Shield of Quality”—extends beyond products and reflects a commitment to safeguarding people, supporting businesses, and creating value for society.

Looking ahead, Armor Fire has set an ambitious Vision 2045: to become a globally recognized fire safety brand with a market capitalization of ₹5,000 crore. The vision includes world-class manufacturing facilities, international expansion, advanced AI-driven fire safety technologies, exports to over 60 countries, and a dedicated NGO promoting fire safety awareness and community development.

More than a manufacturing company, Armor Fire represents the power of purpose-driven entrepreneurship. The journey of Ankur and Pritesh Babariya demonstrates how unwavering commitment to quality, innovation, and responsibility can

transform a small startup into an organization dedicated to protecting lives and building a safer future.

Armor Fire is not just manufacturing safety equipment—it is creating a legacy of protection, trust, and sustainable impact.

Preparing for the Future

- In 2018, Armor Fire acquired an additional 3,600 sq. ft. of land.
- Many viewed it as an expansion.
- The founders viewed it as preparation.
- They understood that tomorrow’s success is built years before it becomes visible.
- The new land represented the next chapter of growth.
- It symbolized readiness for larger production capacities, stronger infrastructure, and broader market reach.

Achieving Full Manufacturing Capability

- A defining milestone arrived in 2021.
- Armor Fire acquired a massive 16,200 sq. ft. factory facility.
- Combined with previous infrastructure, the company now operated across 26,100 sq. ft. of manufacturing space.
- This achievement transformed Armor Fire into a fully integrated, in-house manufacturing organization for fire-fighting equipment.
- For the founders, this was not merely a business achievement.
- It was proof that persistence works.
- A dream that started in a rented shed had evolved into a large-scale manufacturing operation serving customers with world-class capabilities.

The Customer is God

Throughout its growth, Armor Fire never forgot its most important stakeholder:

The Customer.

The founders built the organization around a simple philosophy:

"Customer First, Customer is God."

Every decision is evaluated through three promises:

- **Premium Quality**
- **Timely Delivery**
- **Customer Respect**

This philosophy has helped Armor Fire build lasting relationships with customers, distributors, consultants, contractors, and industry partners.

The company understands that products can be copied.

Trust cannot.

The Armor Fire Culture

Today, Armor Fire is guided by a powerful set of values.

Morality and Responsibility

Integrity is not a slogan.

It is a way of operating.

The company takes ownership of every commitment and strives to do what is right, even when no one is watching.

Transparency

Armor Fire believes that trust grows through honesty.

Customers, employees, vendors, and partners deserve clarity and openness in every interaction.

Never-Ending Growth

The founders believe learning never stops.

The organization continuously invests in leadership development, skill enhancement, technological advancement, and personal growth.

Research and Hard Work

Armor Fire embraces innovation without abandoning discipline.

Research drives progress.

Hard work delivers results.

The combination of both creates sustainable success.

Core Purpose

At the heart of every Armor Fire initiative lies a simple yet powerful purpose:

"To Grow & Secure Lives with Shield of Quality."

This purpose goes beyond products.

It reflects a commitment to protect lives, strengthen businesses, support communities, empower employees, and create lasting value for society.

- Every extinguisher manufactured.
- Every system installed.
- Every customer served.
- Contributes to that purpose.

- Main Board IPO listing.
- A distribution network exceeding 500 partners globally.
- International certifications including UL, FM, LPCB, CE, BIS, and ISO standards.
- A dedicated NGO focused on fire safety awareness, disaster relief, and community development.

Vision 2045: Building a Global Legacy

The founders' ambitions extend far beyond today's achievements.

Armor Fire's Big Hairy Audacious Goal (BHAG) is:

"To Become a World Pioneer Brand with ₹5,000 Crore Market Capitalization by 31st March 2045."

This vision represents much more than financial growth.

It represents leadership.

By 2045, Armor Fire envisions:

- A 100-acre world-class headquarters integrating manufacturing, R&D, training, and sustainability.
- Regional headquarters in Dubai and strategic African markets.
- Four mega warehousing hubs across India.
- Exports to more than 60 countries.
- Advanced AI-powered fire safety solutions.
- Smart detection and suppression technologies.
- A workforce of over 2,000 skilled professionals.
- Recruitment from India's and the world's leading institutions.

Beyond Business

The story of Armor Fire is not merely about factories, machinery, or revenues.

- It is about responsibility.
- It is about protecting families.
- It is about safeguarding dreams.

It is about creating opportunities for employees, partners, vendors, and communities.

Most importantly, it is about two founders who started with limited resources but unlimited belief.

- A belief that quality matters.
- A belief that integrity matters.
- A belief that protecting lives is one of the noblest purposes a business can pursue.

As Armor Fire continues its journey toward global leadership, its foundation remains unchanged.

- Built on trust.
- Driven by innovation.
- Powered by people.
- Dedicated to protecting lives.
- This is Armor Fire.
- A shield of quality.
- A symbol of safety.
- A legacy in the making.

Nature Coat: Preserving Nature, Protecting Surfaces, Building Trust

Devang Brahmbhatt has revolutionized the market for furniture surface finishing with sustainable and aesthetically appealing solutions that retain the warmth and tactile appeal of wood.

As consumers and manufacturers increasingly prioritize sustainability, furniture surface finishing has evolved beyond traditional coatings such as melamine and polyurethane (PU) that often create a plastic-like layer over wood and veneer surfaces, masking their natural texture and authentic appearance. Today, several eco-friendly options provide protection, durability, and aesthetic appeal while minimizing environmental impact.

Natural oils that penetrate wood and waxes retain the warmth and tactile appeal of wood, often enhancing its grain and texture while providing protection.

Devang Brahmbhatt
Founder

Recognizing this gap in the market, Devang Brahmbhatt envisioned a product that would protect wood

without hiding its character. Founded in 2019 by Devang Brahmbhatt, Nature Coat was established with a clear vision: to provide sustainable, high-performance surface finishing solutions that preserve the natural beauty of wood while meeting modern environmental standards.

Today, Nature Coat has emerged as a trusted name among architects, interior designers, builders, furniture manufacturers, and homeowners seeking premium eco-friendly finishing solutions. Built on innovation, sustainability, and customer trust, the company continues to redefine how natural wood surfaces are protected and enhanced.

"Conventional coatings protect wood but compromise the warmth, elegance and tactile beauty that make natural wood *unique*."

THEFOUNDING
INSIGHT
BEHIND
NATURECOAT

The Birth of the Brand

The inspiration behind Nature Coat originated from a challenge frequently faced by architects and interior designers – the conventional coatings protect wood but compromise the warmth, elegance, and tactile beauty that make natural wood unique.

Nature Coat was founded with the

vision of offering a sustainable wood finishing solution formulated using carefully selected natural oils and waxes. Rather than forming an artificial layer on the surface, Nature Coat works in harmony with the wood, penetrating deeply to nourish and protect it while allowing it to breathe naturally.

The result is a finish that enhances the wood's natural grain, richness, and beauty while preserving its authentic touch and feel.

Distinguishing features of Nature Coat

Unlike conventional coatings, Nature Coat functions as a premium wood polish that protects surfaces while maintaining their natural appearance.

Its unique formulation of natural oils and waxes allows the product to penetrate deep into the wood, providing

protection from within rather than creating a thick surface film.

This approach offers several distinct advantages:

- Preserves the natural look and feel of wood and veneer
- Enhances the beauty and richness of natural grain patterns
- Allows wood to breathe naturally
- Maintains authenticity without creating a plastic-coated appearance
- Provides long-lasting protection and durability
- Supports environmentally responsible building practices

Nature Coat enables architects and designers to showcase the true character of wood rather than conceal it.

Building Trust through Innovation

Nature Coat's growth has been driven by a commitment to quality, customer satisfaction, and continuous improvement.

The company collaborates closely with architects, designers, contractors, and developers to deliver practical solutions that meet both aesthetic and performance requirements.

By focusing on sustainable technologies and environmentally responsible products, Nature Coat contributes to India's growing movement toward greener and healthier building practices.

Its guiding philosophy remains simple:
Protect the wood. Preserve its beauty.
Respect nature.

The Founders

Devang Brahmabhatt has played a pivotal role in shaping the company's philosophy and direction based on three core principles: Quality, Integrity and Innovation. This vision has earned Nature Coat a reputation for reliability, sustainability, performance, and customer-focused service.

Entering the business, Bhargav Brahmabhatt is not only expanding the scope of the coating solutions business but exploring new opportunities within the construction and architectural sectors. Today, Bhargav leads initiatives in advanced façade and architectural surface solutions, particularly in the field of MCM Flexible Wall Cladding, bringing innovative and sustainable alternatives to modern building design. Beyond architectural cladding, he is actively involved with H2O Pools & Spas LLP, where he oversees design, construction, and maintenance projects for residential and commercial swimming pools. His entrepreneurial approach has enabled the organization to diversify its expertise while maintaining the same commitment to quality, innovation, and customer satisfaction that defines Nature Coat.

A Legacy Built on Family Values

The partnership between Devang Brahmabhatt and Bhargav Brahmabhatt represents a powerful blend of experience and innovation. While Devang brings extensive industry knowledge, product expertise, and strategic vision, Bhargav contributes fresh perspectives, modern business practices, and a strong understanding of emerging market opportunities.

Together, they continue to build a business culture centered on Excellence, Sustainability, Innovation, Customer Satisfaction and Long-Term Relationships

Future Aspirations

As architecture and construction continue to evolve, Nature Coat remains committed to developing environmentally responsible products.

FROM FARMER TO INDUSTRY LEADER

From a humble farming background to leading one of Gujarat's rising construction chemical brands, Inderjit Singh Gohil has built a journey defined by resilience, innovation, and an unwavering commitment to quality.

As the Founder of Inderjit Construction Chemicals (ICC), Inderjit transformed challenges into opportunities. Armed with a degree in Civil Engineering and practical experience in agriculture, his early career was shaped by hard work and adaptability. After serving as a government clerk and working in land dealing, he made a bold move into the construction chemicals industry in 2014, during a period when the real estate market was experiencing a slowdown.

Despite having no prior experience in the chemical sector, he embraced the challenge with determination. Through extensive research and development, continuous learning, and hands-on experimentation, he gradually built a product portfolio focused on solving real-world construction challenges. Today, ICC is recognized for its customized solutions, rigorous testing processes, and client-specific innovations.

A Milestone Moment

A defining breakthrough for ICC came with its involvement in one of India's largest precast housing projects comprising 6,000 housing units. The

project demanded a high-performance waterproofing solution, and ICC successfully delivered.

This achievement strengthened the company's credibility among leading contractors and demonstrated that a growing brand could successfully compete with established industry players.

Building a Sustainable Future

As the construction industry faces increasing pressure to reduce its environmental impact, Inderjit Construction Chemicals continues to contribute through innovative and performance-driven solutions. By focusing on products that improve durability, reduce material wastage, and enhance overall building performance, the company reflects the principles of sustainable entrepreneurship.

Sustainable Benefits of ICC

- Longer building life through waterproofing and protective systems, reducing repair and reconstruction requirements.
- Reduced cement consumption through specialized mortars and admixtures that improve efficiency and performance.
- Lower construction waste through ready-to-use products such as block joining mortar and ready-mix plaster.
- Improved resource efficiency by enhancing the durability and performance of concrete and masonry structures.

The Vision Ahead

Looking ahead, Inderjit remains focused on expanding the company's footprint and strengthening its position in the industry. His future goals include:

- Expanding manufacturing plants across Gujarat
- Completing more than 150 large-scale projects by 2027
- Achieving ISI certification and transitioning into a private limited company

He also remains actively involved in industry events and continues to educate contractors and engineers about the importance of modern construction chemical solutions.

Message to Young Entrepreneurs

"Focus, stay committed, and don't let distractions like social media derail your goals. Success takes time, effort, and belief."

At 52, Inderjit Singh Gohil continues to learn, grow, and dream bigger—proving that entrepreneurship is not defined by age, but by mindset.

From Sunlight To Significance

The Journey of Suryadip Pativala and Prachi Green Energy

A Dream Rooted In Possibility

Every generation witnesses a few individuals who see opportunity where others see obstacles.

For Suryadip Pativala, the opportunity was shining above everyone every single day.

The sun.

Long before renewable energy became a national movement, Suryadip believed that clean energy would play a defining role in India's future. He understood that energy was not merely about electricity. It was about empowering homes, businesses, farmers, industries, and communities to grow sustainably. Like many first-generation

entrepreneurs, his journey did not begin with a large office, investors, or unlimited resources. It began with a vision and the courage to pursue it.

He was deeply fascinated by technology, infrastructure, and practical solutions that could create long-term impact. As the world

started discussing climate change, carbon emissions, and sustainable development, he saw an opportunity to contribute through action rather than conversation.

That belief would eventually become the foundation of Prachi Green Energy.

A Dream Rooted In Possibility

Every entrepreneur begins with excitement. Soon after comes reality.

The renewable energy sector was filled with opportunities, but it was also filled with challenges. Customers were still learning about solar power. Many people doubted its effectiveness. Some believed the investment was too high. Others questioned whether the

technology would deliver long-term benefits.

Winning trust became more difficult than winning projects.

Like every entrepreneur, Suryadip experienced uncertainty, pressure, and setbacks. But every challenge strengthened his conviction. He understood that building a successful company required patience. Trust could not be purchased. It had to be earned through consistency and performance.

Building More Than A Business

Many companies sell products. Few companies build confidence.

This became the guiding principle behind Prachi Green Energy.

Founded with the mission of accelerating India's transition toward clean and renewable energy, the company focused on providing reliable and high-quality solar solutions for residential, commercial, industrial, and government sectors.

The goal was never simply to install solar panels. The goal was to help customers reduce costs, improve energy independence, and contribute to a cleaner environment.

Every completed project represented a relationship built on trust. Every satisfied customer became proof that renewable energy could create both economic and environmental value.

The Power Of Persistence

Success rarely arrives overnight.

It is usually the result of thousands of small decisions made correctly over many years.

With each project, Prachi Green Energy expanded its expertise and capabilities. The company strengthened its engineering processes, improved execution standards, and invested in delivering reliable outcomes.

Whether it was rooftop solar systems, ground-mounted solar plants, solar water pumping systems, solar street lighting, or complete EPC services, the team focused on quality and long-term performance.

Deliver quality. Deliver value. Deliver trust.

Transforming Sunlight Into Impact

The true measure of a sustainability business is not revenue. It is impact.

Today, Prachi Green Energy has successfully contributed to the installation of more than 20 MW of rooftop solar capacity and over 30 MW of ground-mounted solar projects. The

company serves thousands of customers while helping reduce dependence on conventional energy sources.

Behind every megawatt lies a bigger story: a factory reducing electricity costs, a business becoming more energy efficient, a farmer gaining access to sustainable power solutions, and a family choosing a cleaner future.

These outcomes represent the real value of renewable energy.

Leading With Responsibility

The renewable energy industry is about more than technology. It is about responsibility.

As environmental challenges continue to shape the future of our planet, businesses have an important role to play in creating sustainable solutions.

Suryadip believes that growth and sustainability should move together. Through Prachi Green Energy, he continues to promote innovation, efficiency, safety, and environmental responsibility in every project undertaken.

His vision extends beyond business

success. He wants to contribute to a future where clean energy becomes accessible, affordable, and widely adopted across India.

Powering The Future

Every entrepreneur leaves behind a legacy.

Some build wealth. Some build companies. Some build impact.

The journey of Suryadip Pativala is still being written, but one thing is already clear. His story is not simply about solar energy. It is about believing in possibilities before they become obvious.

From a vision powered by sunlight to a company driving sustainable progress, Prachi Green Energy stands as a reminder that meaningful change begins when someone chooses to act.

As India moves toward a cleaner and more sustainable future, Suryadip Pativala and Prachi Green Energy continue their mission of transforming sunlight into opportunity, innovation into impact, and ambition into lasting change.

Because the future does not wait to be built. It is powered by those who dare to build it today.

From farm to FUTURE WORKFORCE

The rise of Sanjay Patel — and how CampusJobs is rewiring the way India hires its next generation.

Sanjay Patel's journey from a humble farming background to founding CampusJobs is a study in grit and vision. Raised by a farmer, he pursued an MBA in Human Resources and built Evoke HR Solutions into a premier industry leader — yet he never stopped looking for the next problem to solve.

He found it in a stubborn gap: thousands of capable students unable to reach their first job, while campuses and companies struggled to engage fresh talent efficiently. His answer was CampusJobs — a next-generation, technology-driven placement ecosystem built to democratise job access across India.

— OUR VISION

An inclusive, technology-driven employment ecosystem that empowers job seekers, strengthens institutions, and helps organisations find the right talent.

— OUR MISSION

To transform the careers of students and fresh graduates through equal access to opportunity and a seamless, intelligent hiring platform.

Today, the platform uses automation and AI-powered matching to run the entire placement lifecycle. Corporate, campuses, and candidates are brought together on a single intelligent hub. By building an inclusive network of profiles, recruiters, and campus tie-ups, Sanjay isn't just facilitating hiring — he is empowering the next generation of Indian professionals to showcase their potential without barriers. His philosophy stays simple: talent exists everywhere, and opportunity should too.

FOUNDER'S COMMITMENT

Every student deserves a chance to showcase their potential, regardless of background or location. CampusJobs is our commitment to a future where talent and opportunity meet without barriers.

Sanjay Patel

FOUNDER & CEO

Connecting **India's 47,000+** Campuses

AI-Powered Talent Platform

CampusJobs is a unified digital platform that streamlines hiring and campus placements using intelligent technology.

- 
AI-Powered Talent Matching
Find the right talent automatically.
- 
Campus Placement Management
Digitize and automate campus hiring.
- 
Verified Talent Ecosystem
Trusted profiles, skills, and assessments.

Architect Kapil Agrawal: Designing Spaces with Purpose, Sustainability, and Impact

A Vision Beyond Buildings

For Architect Kapil Agrawal, architecture has never been just about designing buildings. It has always been about creating spaces that improve lives, respect the environment, and remain relevant for generations to come.

Building the Foundation: Education and Early Inspiration

Kapil's passion for architecture was shaped during his academic years. After completing his Bachelor's in Architecture from CEPT University, where he was awarded a Gold Medal for academic excellence, he pursued a Master's in Sustainable Architecture from the University of Pennsylvania, USA.

Identifying a Gap in the Industry

When he returned to India, he noticed a significant gap in the built environment. Many buildings were being designed without adequate consideration for

climate, energy efficiency, user comfort, and long-term sustainability.

The Birth of SPACEMATICS

This vision led to the creation of SPACEMATICS, a multidisciplinary design practice built around the belief that every building should solve a problem, respect its users, and contribute positively to the environment.

Creating Meaningful and Sustainable Spaces

Today, SPACEMATICS offers architectural design, interior design, green building consultancy, and sustainability-focused advisory services across multiple sectors.

Championing Green Building Practices

As an IGBC Accredited Professional, Kapil has played an important role in promoting environmentally responsible construction practices and sustainable development.

Building a Culture of Learning and Innovation

Beyond projects and design solutions, Kapil remains deeply invested in mentoring young architects and encouraging thoughtful design practices within the profession.

Overcoming Challenges with Conviction

One of the biggest obstacles was establishing a sustainability-focused practice in a market where many clients were unfamiliar with the long-term

benefits of eco-friendly design.

The Bold Decision That Defined the Journey

Perhaps one of the boldest decisions of his career was choosing to focus entirely on climate-responsive and environmentally responsible architecture.

Recognition and Professional Excellence

The firm's work has earned widespread recognition through multiple prestigious awards and industry accolades.

Looking Toward the Future

Kapil envisions SPACEMATICS becoming a globally recognized practice known for climate-responsive architecture, sustainable innovation, and meaningful design.

A Legacy Built on Responsibility

Through SPACEMATICS, he has transformed his belief into a practice that combines creativity with purpose, innovation with sustainability, and design with lasting impact.

Taking on the challenge of waste management

A first generation entrepreneur in her family, Phani Trivedi is the director of Wastengage Pvt Ltd., a social impact startup of Startup India since 2016. She is an IGBC accredited professional of the Indian Green Building Council and a Green Building Consultant. Phani held the position of Chairperson of the Business Women Wing at the Gujarat Chamber of Commerce & Industry in 2019.

The environmentalist in her staunchly believes in 'Giving Back to Nature, what belongs to Nature'. It is this mission that drives everyone involved to engage in solid waste management, especially biodegradables. Being the first woman entrepreneur of Gujarat to venture into biodegradable waste management, she focused on scientifically treating solid waste and creating a positive social impact.

She has also founded WeEngage Global Foundation. She is a Swachhata Prahari

While many entrepreneurs seek opportunities in emerging industries, Phani Trivedi chose one of society's most neglected challenges—waste. Through WastePro and Wastengage, she has spent more than a decade demonstrating that sustainability begins where waste is generated. Her work in decentralized waste management, composting ecosystems, and environmental education has positioned her among Gujarat's notable green entrepreneurs. Combining social impact with practical innovation, Trivedi continues to champion a future where waste is treated not as a problem to be discarded, but as a resource to be responsibly transformed.

& Influencer of Swachh Bharat Mission Urban, Government of Gujarat, and has been working passionately in the area of decentralization of Solid Waste Management for the last 14 years. She is also into green education in schools and societies.

She was selected among the Top 25 Women Transforming India organized by NITI Aayog, Government of India, the United Nations, and MyGov.gov.in, GOI. She was also featured among the Top 50 Startups of Gujarat at Vibrant Startup Summit 2018.

She has won the Women Entrepreneur of the Year 2018 – Green Business award and has also received the "94.3 My FM – Jiyo Dil Se Award" and "The Trend Setter Award".

She has been Chairperson of GCCI Business Women Wing, headed the FICCI FLO Startup Cell for 6 years, and is on the core committee of IGBC Ahmedabad Chapter.

Articles about her work have been covered by Business World, Times of India, DNA, and Gujarati dailies.

Sustainability Impact

- Source-level waste segregation
- Kitchen waste composting
- Vermicomposting
- Zero-waste campuses and communities
- Environmental awareness and climate action education
- Decentralized solid waste management systems for institutions, industries, and residential communities.

Krupa Shah — Cultivating Purpose through Terrariums

When her horticulturist husband created a **closed terrarium** — a sealed glass ecosystem where plants thrive with minimal human interference — Krupa Shah saw a quiet enterprise waiting inside the jar. Under his guidance she began learning the **science and art of terrarium-making**: plant selection, moisture balance, microclimate creation and ecosystem sustainability.

“ When humans move to Mars or the Moon in the future, plant species will have to be carried in closed ecosystems — just like terrariums.

— DR . K . KIRAN KUMAR , FORMER CHAIRMAN, ISRO

Environmental & Conservation Benefits

Closed terrariums recycle water and air in a closed loop — a water-efficient, pesticide-free method of indoor gardening that supports natural air purification and long-term ecosystem sustainability.

- Self-sustaining water cycle
- Natural air purification
- Zero chemical runoff
- Nutrient cycling
- Biodiversity conservation
- Low-interference ecosystem

Building A Green Business

Krupa started her journey four years ago in Vadodara, and now operates from Gandhinagar. Her venture focuses on closed terrariums — self-sustaining ecosystems requiring minimal maintenance.

- Custom terrariums for homes & offices
- Corporate eco-friendly gifting
- Décor for events & exhibitions
- Workshops for corporates & schools
- Sustainable décor consultation

Strengths & Impact

The biggest challenge has been safe delivery of fragile living ecosystems; Krupa developed specialised packing and controlled logistics for bulk orders.

Continuing through pregnancy and early motherhood reinforced her belief that women can build businesses without giving up personal roles. Her dream: green experience centres across cities.

Recognition & Vision

A defining moment came when Dr. K. Kiran Kumar, former Chairman of ISRO, appreciated her work — aligning her décor concept with space science, sustainability and the future of humanity.

Each piece is handcrafted, combining scientific precision with aesthetic beauty, drawing on her chemistry background and horticultural expertise.

Entrepreneurship doesn't always begin with a loud idea — **sometimes it begins quietly, inside a glass jar** , nurturing life, hope and a greener future.

PRT Innovations Pvt. Ltd.: Transforming Composite Waste into Sustainable Opportunities

Ritesh Patel is the Founder and CEO of PRT Innovations Pvt. Ltd., a Gujarat-based enterprise established in 2024. Through PRT Innovations, Patel is focused on developing innovative industrial and manufacturing solutions while building a business rooted in technology, efficiency, and sustainable growth.

Pioneering the Future of Composite Recycling

As industries worldwide continue to embrace advanced materials such as carbon fiber and composite structures, a significant challenge has emerged—how to responsibly manage and recycle these high-performance materials at the end of their lifecycle. Recognizing this challenge, entrepreneur and innovator Ritesh Patel established PRT Innovations Pvt. Ltd. with a mission to transform industrial waste into valuable resources.

The Vision Behind the Innovation

For Ritesh Patel, recycling is not merely about waste management—it is about preserving value, reducing environmental impact, and creating new possibilities through innovation. His dedication to sustainable technology inspired him to develop solutions that support circular economy principles.

Developing the Solvansy™ Process

For Ritesh Patel, recycling is not merely about waste management—it is about preserving value, reducing environmental impact, and creating new possibilities through innovation. His dedication to sustainable technology inspired him to develop solutions that support circular economy principles.

Research-Driven Growth

Innovation remains at the heart of PRT Innovations. The company continuously invests in research and development focused on carbon fiber recovery, composite waste valorization, sustainable material processing, and industrial-scale recycling solutions.

Proving Performance Through Science

PRT Innovations actively validates its technologies through independent testing and scientific research. These efforts demonstrate that recycled

PRT INNOVATIONS PVT. LTD.
Patented Recycling Technology for Composite Materials

Turning Composite Waste into Valuable Resources

What Problem We Solve	Our Solution	Key Benefits
- Composite waste is difficult to recycle and mostly landfilled or incinerated - High disposal costs and increasing environmental regulations - Loss of valuable fibers and materials	- Patented chemical-physical process for fiber separation - Recovery of carbon and glass fibers for reuse - Environmentally responsible and scalable recycling	- Landfill and incineration reduction - Circular economy for composites - ESG and regulatory compliance - Carbon footprint reduction

To become a leading global technology provider for sustainable composite recycling and circular material solutions.

+91 63543 81613 | ritesh.patel@reshape.ind.in

composite materials can retain significant performance characteristics while supporting sustainability goals.

Creating Meaningful Environmental Impact

The company contributes to reducing landfill waste, conserving valuable resources, lowering carbon emissions through material reuse, and helping industries achieve ESG and sustainability objectives.

Leadership with Purpose: Ritesh Patel

As Founder and Director, Ritesh Patel has dedicated his entrepreneurial journey to solving industrial challenges through innovation. His vision is to build a sustainable future through circular manufacturing, responsible resource management, and advanced recycling technologies.

"Recycling is not just about waste reduction—it is about recovering performance, preserving material value, and enabling the future."

FROM STONE TO SUSTAINABILITY

Lalit Munot, a Rajasthan-based entrepreneur is reviving India's ancient wisdom through Goymaa.

How a Rajasthan-Born Entrepreneur is Reviving India's Ancient Wisdom Through Goymaa

Success is often measured by the businesses we build, but true impact comes from the lives we touch. For the founder of Goymaa, entrepreneurship began in 2010 in the granite and marble industry. Born and raised in Balotra, Rajasthan, and later establishing his business base in Ahmedabad, he built a successful enterprise serving leading builders and developers across the region.

Yet, despite commercial success, he felt a deeper calling—one that extended beyond profits and into the realms of health, sustainability, and social well-being.

The inspiration came from a familiar place: his own kitchen. Growing up, he

experienced the purity of traditional Indian foods, from hand-churned Bilona ghee to natural ingredients prepared with care and wisdom. As modern lifestyles drifted away from these practices, a question began to shape his vision:

“When did we lose the wisdom of our food?”

Driven to rediscover these roots, he explored traditional food systems, Panchagavya-based innovations, sustainable farming practices, and holistic wellness. This journey led to the creation of Goymaa, a purpose-driven brand built on the philosophy:

“Rooted in Wisdom. Grown with Grace.”

Today, Goymaa offers a thoughtfully curated range of products, including traditional A2 Bilona Ghee crafted through the Vedic Bilona method, pure wild forest honey, wellness essentials, personal care solutions, and innovative cow-based sustainable products. Every

offering reflects the brand's commitment to purity, authenticity, and conscious living.

What sets Goymaa apart is its ability to bridge ancient knowledge with modern needs. In an era driven by speed and mass production, the brand chooses quality over shortcuts, sustainability over convenience, and long-term well-being over temporary gains. Beyond food and wellness, Goymaa is actively promoting eco-friendly innovations and sustainable lifestyle solutions inspired by traditional Indian wisdom. Through its work, the brand encourages consumers to make healthier choices while supporting practices that benefit both people and the planet.

As awareness around health, sustainability, and mindful consumption continues to grow, Goymaa stands as a powerful example of how traditional knowledge can address modern challenges. The founder's journey—from the granite and marble industry to building a purpose-led wellness brand—demonstrates that entrepreneurship can be a force for meaningful change.

By preserving ancient traditions and making them relevant for today's world, Goymaa is helping people reconnect with nature, embrace conscious living, and rediscover the timeless wisdom that has nourished generations.

Because sometimes the most powerful innovations are not new inventions— they are timeless traditions brought back to life.

Sakshi Maheshwari

NOURISHING A KINDER FUTURE

When Conscious Living Became a Mission

Inspired by a desire to align her lifestyle with her values, Sakshi embraced a plant-based journey and soon identified a gap in the market. While demand for plant-based nutrition was growing, accessible and affordable options remained limited.

This insight led to the creation of Vegan Basket, which later evolved into Whole and Grow—a purpose-driven brand committed to making clean, sustainable, and plant-based nutrition simple, practical, and accessible for everyone.

Building More Than a Brand

For Sakshi, entrepreneurship is about creating meaningful change. Through Whole and Grow, she aims not only to offer better nutritional choices but also

to inspire greater awareness about the relationship between personal health and planetary well-being.

Every product and innovation reflects a simple philosophy: nourishment should support both people and the environment without compromise.

Today, as Whole and Grow continues to expand, Sakshi remains focused on a larger purpose—to help create a world where health does not come at the cost of compassion and progress does not come at the expense of nature.

What began as a student's curiosity has evolved into a mission-driven movement, proving that the most impactful businesses are often built on deeply held values rather than market trends alone.

"Through Whole and Grow, Sakshi Maheshwari is building a healthier future for people and the planet."

How One Question Sparked a Mission to Transform the Way We Eat

Some journeys begin with a business plan. Others begin with a question that quietly changes everything.

For Sakshi Maheshwari, that question emerged during her years as a Biotechnology student in Indore. Raised in a traditional Indian household, food was a natural part of everyday life—something shared, celebrated, and rarely questioned. But as her understanding of nutrition, sustainability, and food systems deepened, so did her curiosity about the impact of what people eat.

She began exploring the connections between health, environmental responsibility, and conscious living. What started as academic interest soon became a personal journey. The more she learned about climate impact, animal welfare, and nutrition, the more she realized that every food choice carries consequences far beyond the plate.

Benchmarking A New Standard for Sustainable Travel

Yogesh Srivastava's MyEcoTour focuses on sustainable, responsible, and immersive tourism experiences, combining luxury travel with environmental and community impact. It aims to reduce tourism's carbon footprint through responsible travel practices and reforestation initiatives.

Yogesh Srivastava
Director, Whispering Earth LLP

The tourism sector is a significant contributor to global greenhouse gas (GHG) emissions, through its many components like transportation, accommodation, food, shopping, and tourism-related activities.

The late Dr Ruchira Srivastava founded **Whispering Earth LLP**, a Mumbai-based ecotourism company promoting responsible travel experiences that support local ecosystems and communities. After her demise, Yogesh Srivastava heads the company. Through its flagship brand launched in 2023, MyEcoTour the company encourages low-impact tourism, regenerative travel practices, and partnerships with local conservation projects. It aligns with India's growing

eco-tourism movement, linking travellers to authentic cultural and natural experiences that benefit host regions economically and environmentally.

Sustainable Tourism Approach

The company's public communication consistently advocates practical, responsible travel choices, from selecting eco-conscious accommodation and supporting local businesses to reducing waste, respecting local cultures, and remaining mindful of carbon impact. MyEcoTour is a bespoke travel brand that curates customized domestic and international travel experiences with a focus on wildlife, nature, wellness, cultural immersion, rural tourism, and offbeat destinations. Their focus on rural and seasonal tourism models is designed to

direct visitor spending toward local farmers, artisans, and community enterprises while helping preserve cultural continuity.

The company promotes carbon-conscious travel and tree-planting initiatives. The figures are impressive: more than 80 tonnes of CO₂ offset by neutralizing the carbon footprint of guest journeys through tree-planting initiatives in partnership with organizations like Grow Trees and Tree Nation. Over 900 trees have been planted through these initiatives.

MyEcoTour designs tours that are sensitive to the environment whether it is calculating carrying-capacity awareness in Ladakh, forging partnerships with eco-friendly lodges or using the services of green-certified operators at various island destinations like Bali, the Maldives, and Seychelles.

“MyEcoTour combines immersive experiences, measurable environmental action, and a distinctly future-facing brand model that sets it apart in tourism.”

Recognised Excellence

Whispering Earth LLP — Winner, India 5000 Best MSME Awards 2024 for Quality Excellence in responsible, regenerative tourism.

Designing Dreams, Building Futures

How **Geeta Patel** Turned Challenges into Opportunities and Redefined Interior Design Education

A Vision That Became an Academy

A major turning point came when the institute where she taught unexpectedly shut down. Encouraged by her students, Geeta founded Geeta Patel's Academy for Interior Design in 2015.

Beyond Education

Alongside the academy, Geeta expanded her entrepreneurial journey through InArc Creationss, specializing in:

- Premium Residential Interiors
- Villas
- Commercial Projects
- Turnkey Solutions

Resilience During COVID-19

When the pandemic disrupted traditional education, Geeta ensured learning continued through online classes, onsite sessions, and personalized guidance. Her commitment helped the academy successfully transition into a hybrid learning model.

From Challenges to New Beginnings

Born and educated in Mumbai, Geeta Patel faced several unexpected turns in her educational journey after relocating to Ahmedabad. Financial challenges and the closure of the Ayurvedic college where she was studying forced her to rethink her future. Instead of giving up, she continued learning while balancing family responsibilities and completed the Certificate in Computing (CIC) program from IGNOU with distinction.

Turning Passion into Purpose

Through teaching English, conducting group tuitions, and mentoring NIOS students, Geeta discovered her passion for education. At the same time, her interest in interior design grew, leading

Key Mission

"To create industry-ready interior designers through practical, hands-on learning."

Building Future Designers

The academy focuses on real-world learning, helping students develop:

- Design principles and creativity
- Client interaction skills
- Project execution knowledge
- Communication and professional ethics

Today, 250+ students have benefited from her mentorship, with many building successful careers in the design industry.

Recognition & Achievements

Her contributions have been recognized through several prestigious honors:

- Shikshan Ratna Award
- Powerful Fempreneur Award
- Entrepreneur of the Year Award (Service Industry)
- Nari Shakti Award
- Sardar Patel Award

Vision for the Future

Geeta dreams of establishing a university dedicated to interior design education, built on innovation, practical learning, and industry exposure.

"Great Design Is Not Only About Transforming Spaces – It Is About Transforming Lives."

The Woman Who Believes Sustainability Begins in the Human Mind

The world is talking about sustainability.

Governments are introducing environmental policies. Organizations are investing in renewable energy. Communities are planting trees, reducing waste, and exploring ways to protect the planet for future generations.

Yet amidst these important conversations, one woman poses a question that few pause to consider:

Can a disturbed mind create a sustainable world?

For **Mitali Patel**—hypnotherapist, Reiki Master, meditation and mindfulness teacher, and life coach—the answer is simple:

“No.”

Her journey into healing began with a

deep fascination for understanding human beings from the inside out. Having studied biotechnology, biochemistry, microbiology, and later social work, she spent years exploring the intricate relationship between the body, mind, emotions, and human behavior.

People do not neglect their health, relationships, communities, or the environment because they do not care. More often, they are overwhelmed, disconnected, stressed, exhausted, or operating in survival mode. And a person in survival mode rarely thinks about sustainability.

“When the mind is anxious, exhausted, or emotionally burdened, it becomes difficult to care for yourself, let alone care for others or the environment,” Mitali explains.

This realization became the foundation of her mission: **creating sustainable humans**.

The Goal for Each Individual

While most sustainability initiatives focus on external systems, Mitali focuses on the human being behind every system. She believes that sustainable homes, organizations, communities, and environments can only emerge when individuals cultivate inner stability, emotional resilience, self-awareness, and conscious living.

Her work integrates hypnotherapy, Reiki,

meditation, and mindfulness to help people reconnect with themselves.

The Results

Over the years, Mitali has witnessed profound shifts in the people she works with. Individuals burdened by anxiety discover inner peace. Those trapped in cycles of self-sabotage develop confidence and clarity. People who once felt disconnected begin making more conscious choices in every aspect of their lives.

A person who learns to care for their inner world often begins caring for the outer world as well.

For Mitali, this is where true sustainability begins.

A sustainable environment requires sustainable habits.

Sustainable habits require sustainable thinking.

Sustainable thinking comes from a healthy and conscious mind.

Dharmesh Satwara: Empowering India's MSMEs Through Fintech Innovation

Building a Smarter Way to Manage Business

Zybra was created to address a common problem faced by MSMEs across India—complex accounting and compliance processes that consume valuable time and resources. The platform brings together accounting, billing, GST filing, inventory management, expense tracking, payment management, and business analytics into one integrated cloud-based solution.

Technology Designed for Modern Businesses

Zybra offers Cloud Accounting Software, GST Compliance & Return Filing, Billing & Invoicing, Inventory Management, Expense Tracking, Payment Collection Management, and Business Analytics & Reporting.

In the story of India's digital transformation, much attention is often given to consumer-facing startups, unicorns, and disruptive technologies. Yet, some of the most meaningful innovations emerge from entrepreneurs who focus on solving everyday challenges faced by millions of small businesses. Dharmesh Satwara belongs to this category of entrepreneurs—leaders who are quietly reshaping the way India's MSMEs manage their financial operations.

As the co-founder and director of Zybra Private Limited, Satwara has dedicated his entrepreneurial journey to simplifying accounting, compliance, and financial management for small and medium enterprises.

Zybra Private Limited: Empowering Indian MSMEs Through Smart Accounting Solutions

Simplifying Business Finance for India's Growing Enterprises

Managing accounting, taxation, inventory, and compliance can be overwhelming for small and medium-sized businesses. Recognizing this challenge, Zybra Private Limited was founded with a vision to simplify

financial management and empower entrepreneurs through technology. Headquartered in Ahmedabad, Zybra has emerged as a leading cloud-based accounting and business management software company helping businesses streamline operations, stay GST compliant, and make informed financial decisions.

Serving Thousands Across India

According to company data, Zybra supports more than 100,000 active users, 25,000+ businesses, and 500+ Chartered Accountants and Tax Consultants across India.

The Entrepreneurial Journey of Dharmesh Satwara

Dharmesh Satwara, Co-Founder and Director of Zybra, pursued an MBA in Finance and began his entrepreneurial learning journey while working as a salesperson during his college years. After gaining experience in the banking sector, he co-founded Zybra in 2015 with the vision of simplifying accounting and financial management for Indian businesses.

Leading Digital Transformation for MSMEs

Under the leadership of Dharmesh Satwara and the founding team, Zybra has evolved into a modern fintech SaaS company helping businesses automate processes, maintain compliance, and gain real-time financial visibility.

Looking Ahead

As India's MSME sector continues its digital transformation journey, Zybra remains committed to empowering entrepreneurs with intelligent, efficient, and accessible financial management solutions.

**Enquire to be part of
the community.**

FROM THE CO-FOUNDER'S DESK

India Is No Longer Waiting. Neither Is Its Youth.

Friends,
I belong to a generation that did not wait for permission to dream - and India is rewarding that courage like never before.

We have the largest youth population in the world. Most people call this an advantage. I call it a responsibility. An advantage is something you're given. A responsibility is something you carry. And the young founders, the women

building their first ventures, the creators and changemakers of this generation - they are choosing to carry it.

Here is what I've learned: talent decides whether you start. The people around you decide how far you go. A young entrepreneur with the right circle moves faster than a brilliant one standing alone. That single truth is why we built Peers Global - so that no first-time founder, and no woman taking her first bold step into business, ever has to build in isolation.

Viksit Bharat 2047 will not be handed to us by a few large institutions. It will be built by millions of small decisions taken today - one startup launched, one job created, one problem solved, one person lifting another. That is the India I want to leave behind: businesses that earn trust, create value, and care about the world they grow in.

The future of Bharat is not something we will witness. It is something we will build - together.

Saath Chalein.

*With gratitude and conviction,
Vishal Parmar*

Co-Founder, Peers Global

*"Young minds. Bold
founders. A Bharat that
builds itself."*

PeersGlobal
Community of Collaboration

You were never meant to **build alone.**

OUR BELIEF

We were told a story.
That success is a solo climb.
That the strongest founders carry it alone.
That needing people is a weakness to hide.

It's a lie.

And it's costing a generation of entrepreneurs their best work.

Because here is a truth ,

you become the average of the five people closest to you.

Which means your circle is your ceiling.

Change your circle , and you change everything.

This is why Peers Global exists. Not to add you to a network. To place you inside a circle of people who rise , and who lift you as they do.

"We don't need more contacts.

We need real partners."

In every story, the same ache surfaced. That ache became a seed.

The seed became Peers Global.

The world's first Community of Collaboration

DESIGNED IN BHARAT BUILT FOR THE WORLD

THE SHIFT

Networking gives you contacts. Collaboration gives you a **future**.

You've done the events. Collected the cards. Joined the groups. And still, when the hard decision comes, you face it alone. **Networking is taking. Collaboration is building, together.** One fills your phone. The other changes your life.

Traditional Networking

- You exchange cards
- You take
- You're a member
- Transactional

COLLABORATION

- You build partnerships
- You give first
- You're a partner
- Transformational

THE ENGINE

Every member grows on three rails. **The LSR Model.**

LEARNING

Sharpen how you think.

SALES

Multiply how you sell.

RESOURCES

Expand what you can reach.

***Learn. Sell. Build. Every month.
Every Circle.***

HOW WE COLLABORATE

Collaboration here isn't a slogan. It's a **Life Impact System**

Inside Peers Global, members grow each other in ten real ways.

- | | |
|---|--|
| 01 Business Referrals
Send real business to one another. | 02 Joint Ventures
Build something bigger, together. |
| 03 Mentorship
Learn from those a few steps ahead. | 04 Vendor & Service Exchange
Trusted hands for every need. |
| 05 Cross-Border Connections
Go global through your peers. | 06 PR & Media Visibility
Get seen, get known. |
| 07 Knowledge Sharing
Wisdom, freely given. | 08 Emotional Support
Because building is hard. |
| 09 Execution Support
Get unstuck, move faster. | 10 Getting Things Done
A peer steps in and makes it happen. |

WHERE IT LIVES

Your home inside Peers Global is your **Circle**.

A focused community of entrepreneurs who meet, build, and win together.

18 **Circles** across industries and shared goals, from Realty to TechSphere, Founders to Investors. There's a Circle built for where you're going.

Industry-Specific Circles

- Manufacturing & Engineering Circles
- Real Estate, Construction & Infrastructure
- Technology, IT & Digital Services Circles
- Healthcare, Wellness & Life Sciences Circles
- Education, Training & Skill Development Circles
- Events, Fashion, Apparel & Lifestyle Circles
- CSR, NGOs, Impact & Nation-Building Circle
- Franchise & Licensing Circles
- Sustainable & ESG Business

Interest (Goal & Purpose)-Specific Circles

- Import, Export & Global Trade Circles
- Startup Founders Circles
- **SME IPO Goal Circles**
- Investors Circles
- Global Expansion (Cross-Border) Circle
- MSME Entrepreneurs Circles
- Family Business Circles
- Young Entrepreneurs (Below 35) Circle
- Leadership & Transformation Circle

Monthly Circle Meets + Quarterly City Meets + Annual National/Global Conventions

What an evening with your Circle actually feels like.

Every month, your Circle follows one rhythm, five stages designed to turn a room of entrepreneurs into a force.

IGNITION Gratitude & Life Impact Round

We open with gratitude, and each member shares a life they impacted this month. The room starts in giving, not taking.

SPOTLIGHT Brand Showcase

One member's brand takes center stage, a deep, focused look so the whole Circle can refer, support, and amplify it.

EDGE Impact Mentor Masterclass

A mentor who has actually done it shares one sharp, practical edge you can apply to your business immediately.

COLLISION Collaboration Roundtables

The heart of the evening, structured roundtables where referrals, joint ventures, and real partnerships are sparked.

CLOSING Impact Recognition

We close by celebrating the impact made, because what gets recognised, gets repeated.

WHO IT'S FOR

For Growing Entrepreneurs.

- Serious about growth, not just survival
- Believes in giving before taking
- Wants partners in business and friends in life
- Ready to grow through collaboration, not competition

If that's you, you're already one of us.

What Makes Peers Global Truly Different?

Publish your Business stories

Piyush Vayeda – Making Healthcare Simple and Caring for Elders

Piyush Vayeda is a first-generation entrepreneur who left a good job in France after 12 years to solve a problem that was close to his heart – caring for his elderly parents in a better way.

Coming from a great family, and living with elders in his own family, Piyush saw how difficult it was to keep them healthy, happy, and most importantly, safe. This personal experience pushed him to take a big step and create something that could help many families.

The Family Member – Care That Feels Like Family

In 2017, he started The Family Member, a service that sends trained and trusted caregivers to help elders and patients at home. So far, this company has provided over 8 lakh home care services.

What makes it different? Caregivers are properly trained, their backgrounds are checked, and they are taught to be kind, patient, and professional – just like a real family member.
